### Guidance for Use

To be used for photovoltaic systems according to the indication given in the standard CEI 64-8 section 712 (HD 60364-7-712). For intended use:

- outdoor and indoor permanent installation, for free movable, free hanging and fixed installation
- installation in conduits and trunkings on, in or under plaster as well as in appliances;
- for the application in/at equipment with protective insulation (protection class II).
- also for underground installation

They are inherently short-circuit and earth fault proof according to HD 60364-5-52.
