ABOUT US

ICEL starts its electrical cable production business in the first half of the 1950s as a private company and turns into a cooperative in 1978, by means of what today would be called a "workers buyout".

Today ICEL is a modern and well organized company, one of the main players in the electric cable sector in Italy and in Europe. It extends over an area of more than 76,000 square meters and it has over 230 employees with a turnover of nearly 200 million Euro. In addition to the main plant in Lugo (RA), the company also has a further plant in Zingonia (BG) and a warehouse in Salerno.

In 2017 ICEL sets up the Icel Special Cables s.r.l. associated company, of which it holds 49%, with an important partner, in order to penetrate those markets requiring "special" cables, with specific technical characteristics.

On 5 November 2018 ICEL announces the acquisition of the Alfa Trafili Srl Company in Alfianello (BS). This is one of the leading companies in the Italian market for the production of copper wire rods from continuous casting and for the processing of copper and aluminium for electric cable producers as well as end-users in the public utilities sector. Alfa Trafili has two plants for a total of 20,000 square meters covered and an annual turnover of over 50 million Euro.

The ICEL GROUP brand is established.

MISSION

From **copper casting** to the **final cable**

with **quality** and **safety**
we give **value to people**
and to **environmental protection**

Our mission is focused on **quality, product safety** and **customer service**, known as one of the best on the market, by guaranteeing the best possible working conditions as our main goal, enhancing all potentialities and qualities of our human resources. Environmental protection and preservation and the link with the territory are integral part of the company strategies, which turn into daily actions of improvement through the conscious use of resources in the production process and the awareness raising of both the stakeholders and the entire supply chain.

Every day we design and manufacture new cables and conductors through highly-advanced equipments, laboratories, cooperating with specialists and using new sustainable materials, always maintaining our highest quality.

We deal with power connection and transmission in infrastructures, hospitals, schools, houses, etc... We guarantee safe quality products, certified by qualified laboratories that are recognized in Italy and Europe.

VISION

We aim at being a leading company in the cables and conductors market by focusing on the renewable energy market and sustainable mobility. We believe that our values, such as **safety, quality, innovation** and **people** will bring us to be the protagonists of the future, creating a solid and winning network together with our customers and suppliers.

Values are the building blocks of our identity

Safety

Our products are safe, designed and manufactured according to the regulations in force and are certified by qualified laboratories that are recognized in Italy and Europe.

Quality

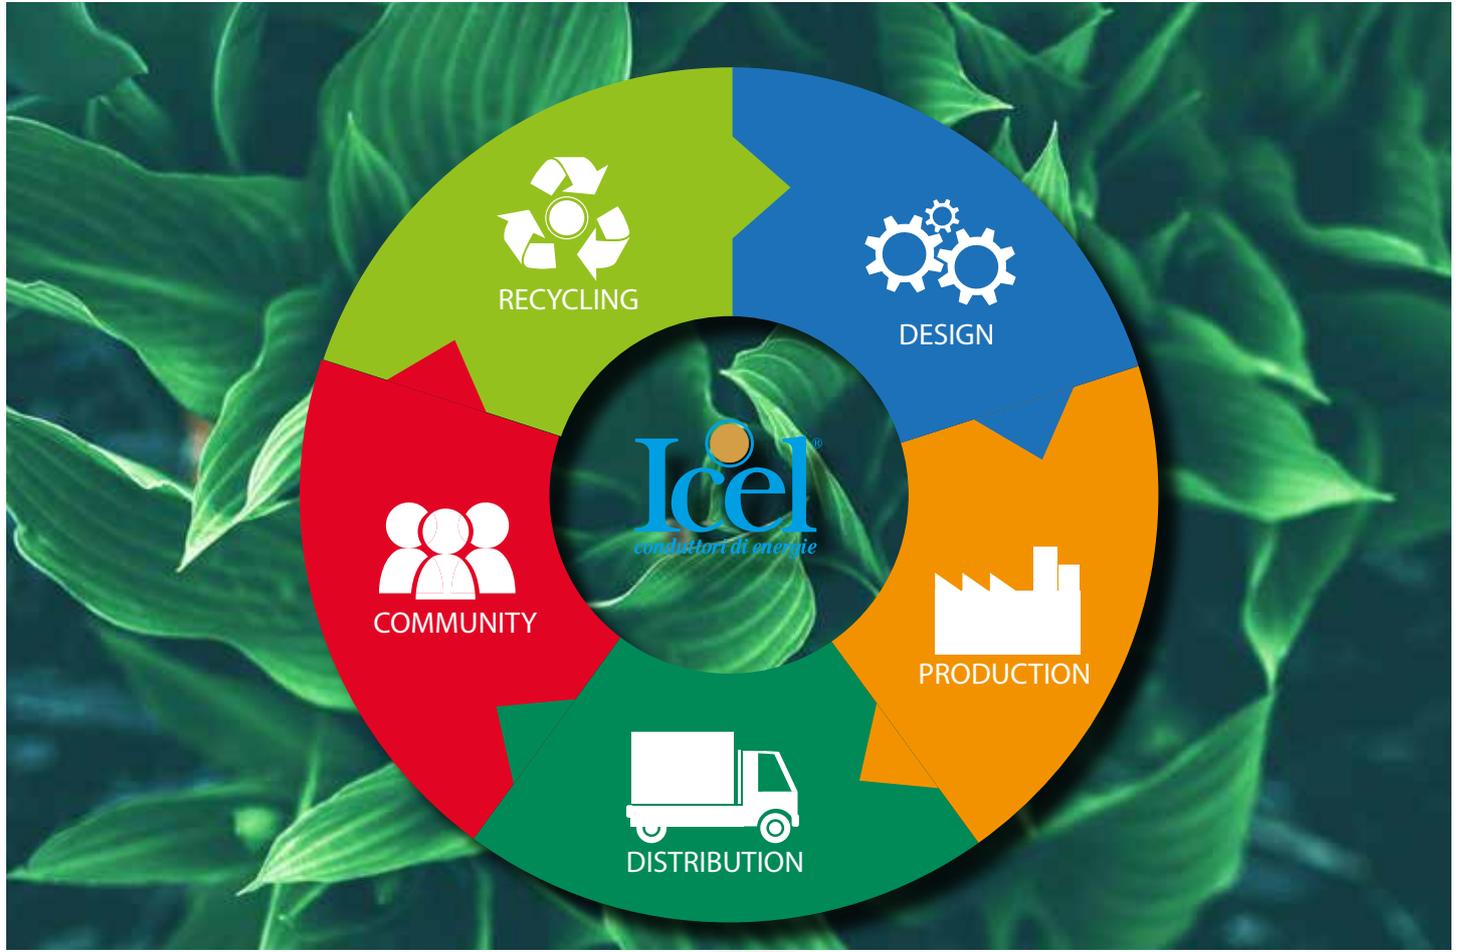

We design our products considering the environmental impact without giving up their quality, that is universally and traditionally recognized by our customers. Our processes, starting from copper casting to the realization of the finished cable, are certified according to ISO 9001: 2015 (Quality) and ISO 14001: 2015 (Environment).

Innovation

Innovation is what represents us. We look at the future by investing in high-tech equipments and in energy efficiency, focusing on innovative products, always open to new projects that can help change and anticipate the market needs.

People

We guarantee our members and partners an ideal workplace where people are committed every day to do their best for developing ideas and innovative projects, maximizing the potential and qualities of every single person.

SUSTAINABILITY

RECYCLING

In addition to the proper management of separate waste collection and a continuous waste reduction in the production process, we rework and re-process copper waste. We are testing the use of recycled PVC from our processes waste, seeking solutions that maintain unchanged the product quality and safety.

DESIGN

The design and development of our products is focused on the highest quality and on the continuous research for reducing environmental impact, both in the production of cables and conductor and in the use of packaging, making the end user aware of a proper disposal.

PRODUCTION

During our production processes we monitor continuously energy consumption and we keep on investing in new plants and technologies to increase efficiency and to reduce consumption. A significant quantity of energy is produced internally by our photovoltaic systems.

DISTRIBUTION

We try to minimize emissions by optimizing transport with full truck loadings and asking our suppliers to comply with our environmental guidelines.

COMMUNITY

Creating value in the territory where we operate is important for our group and this attention turns into concrete support for social activities in cooperation with non-profit organizations, for cultural activities as well as for sports activities for young people through the sponsorship of the local athletic team.

OUR SECTORS

ICEL

We design and produce cable, low voltage energy conductor for various sectors such as renewable energy, e-mobility, public and private buildings, industries, ships, tunnels and stations.

PRODUCTS

ALFA TRAFILI

We manufacture copper wire rod, copper and aluminium conductors for electric cables manufacturers or for end-users in the public utilities sector.

ISC

We produce and design special cables for home automation.

OUR SUCCESS

ICEL GROUP
works with the
leading
exponents of this
sector like

ENEL, TERNA, RFI, FINCANTIERI as well as with the
most important Italian and European distributors.

Since 2019 ICEL has been a technical sponsor of Trentino Gresini MotoE Team.

The partnership with the Gresini Team in the MotoE championship, where e-mobility is the key actor, is our clear message that sustainability and environmental protection are our key pillars.

This cooperation helps us spread the values in which ICEL has always believed, in the present as well as in the past, and with a careful look at the future. In fact, we continue to invest in research and awareness-raising among people and companies to constantly improve the environmental sustainability of our actions.

In 2019 ICEL has also become one of the 46 excellent Italian companies awarded by Deloitte with the **BEST MANAGED COMPANY AWARD 2019**, destined to reward the commitment and abilities of Italian companies which stand out by becoming market leaders and pursuing excellence in the business management.
